Forecast for Monday 14 Oct 2024

Weather: Heavy rain easing into daybreak, but providing a damp and drizzly start to the morning. Drizzle dying away and becoming increasingly dry. Staying largely cloudy but occasional brighter intervals will develop, these most likely during the afternoon, ahead of thickening cloud and a little further drizzle into the evening.

Chance of cloud-free hill tops above 600m: 10% becoming 40% by late afternoon in the south and west.

Low cloud and visibility: Extensive cloud above 200-400m at first, lifting to 400-600m by midday and starting to break. Widely very poor visibility at first, even at lower levels where occasional drizzle is likely. Becoming generally good through the day but remaining poor or very poor on the higher slopes in the cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Extensive mist and fog through the morning will make navigation challenging on unfamiliar routes, especially those over featureless terrain with visibility below 200m at times.

Recent rainfall: measured at Neuadd: altitude 353m

02:00 on Mon 14 Oct 2024	2mm	4.6mm	4.8mm

Forecast for Tuesday 15 Oct 2024

Weather: A largely cloudy day with the chance of some intermittent light drizzle during the morning. Largely dry during the afternoon but turning windier and possibly becoming wet during the evening with showery rain, perhaps heavy, arriving from the south.

Maximum wind: Southeasterly 25-30 mph gusting 35-40 mph.

Chance of cloud-free hill tops 600m: 40% becoming 60%.

Low cloud and visibility: Periods of cloud above 500m during the morning lifting to become periods above 600-700m during the afternoon. Poor visibility in the cloud but generally good visibility at lower levels. Turning occasionally poor at all levels by the evening as the rain sets in.

Temperature: **Valleys:** Plus 7 Celsius rising to plus 15 Celsius.
At 600m: Plus 9 Celsius.
Freezing level: Above the summits.
